# Fuelling the Digital Water Future

# The World is Facing a Water Crisis

*By 2025, 1.8 billion people are expected to be living in countries or regions with "absolute water scarcity."*

At the same time **30%** of water is lost before reaching customers' taps

# The Rise of Digital Twins in Water Management

**Companies** using digital tools to become water positive still **lack data**.

- **Limited sensor coverage** leaves water losses undetected.
- **Power requirements** make sensors costly to install and maintain.
- **Data delay** prevents timely & cost-effective problem detection and fixes.

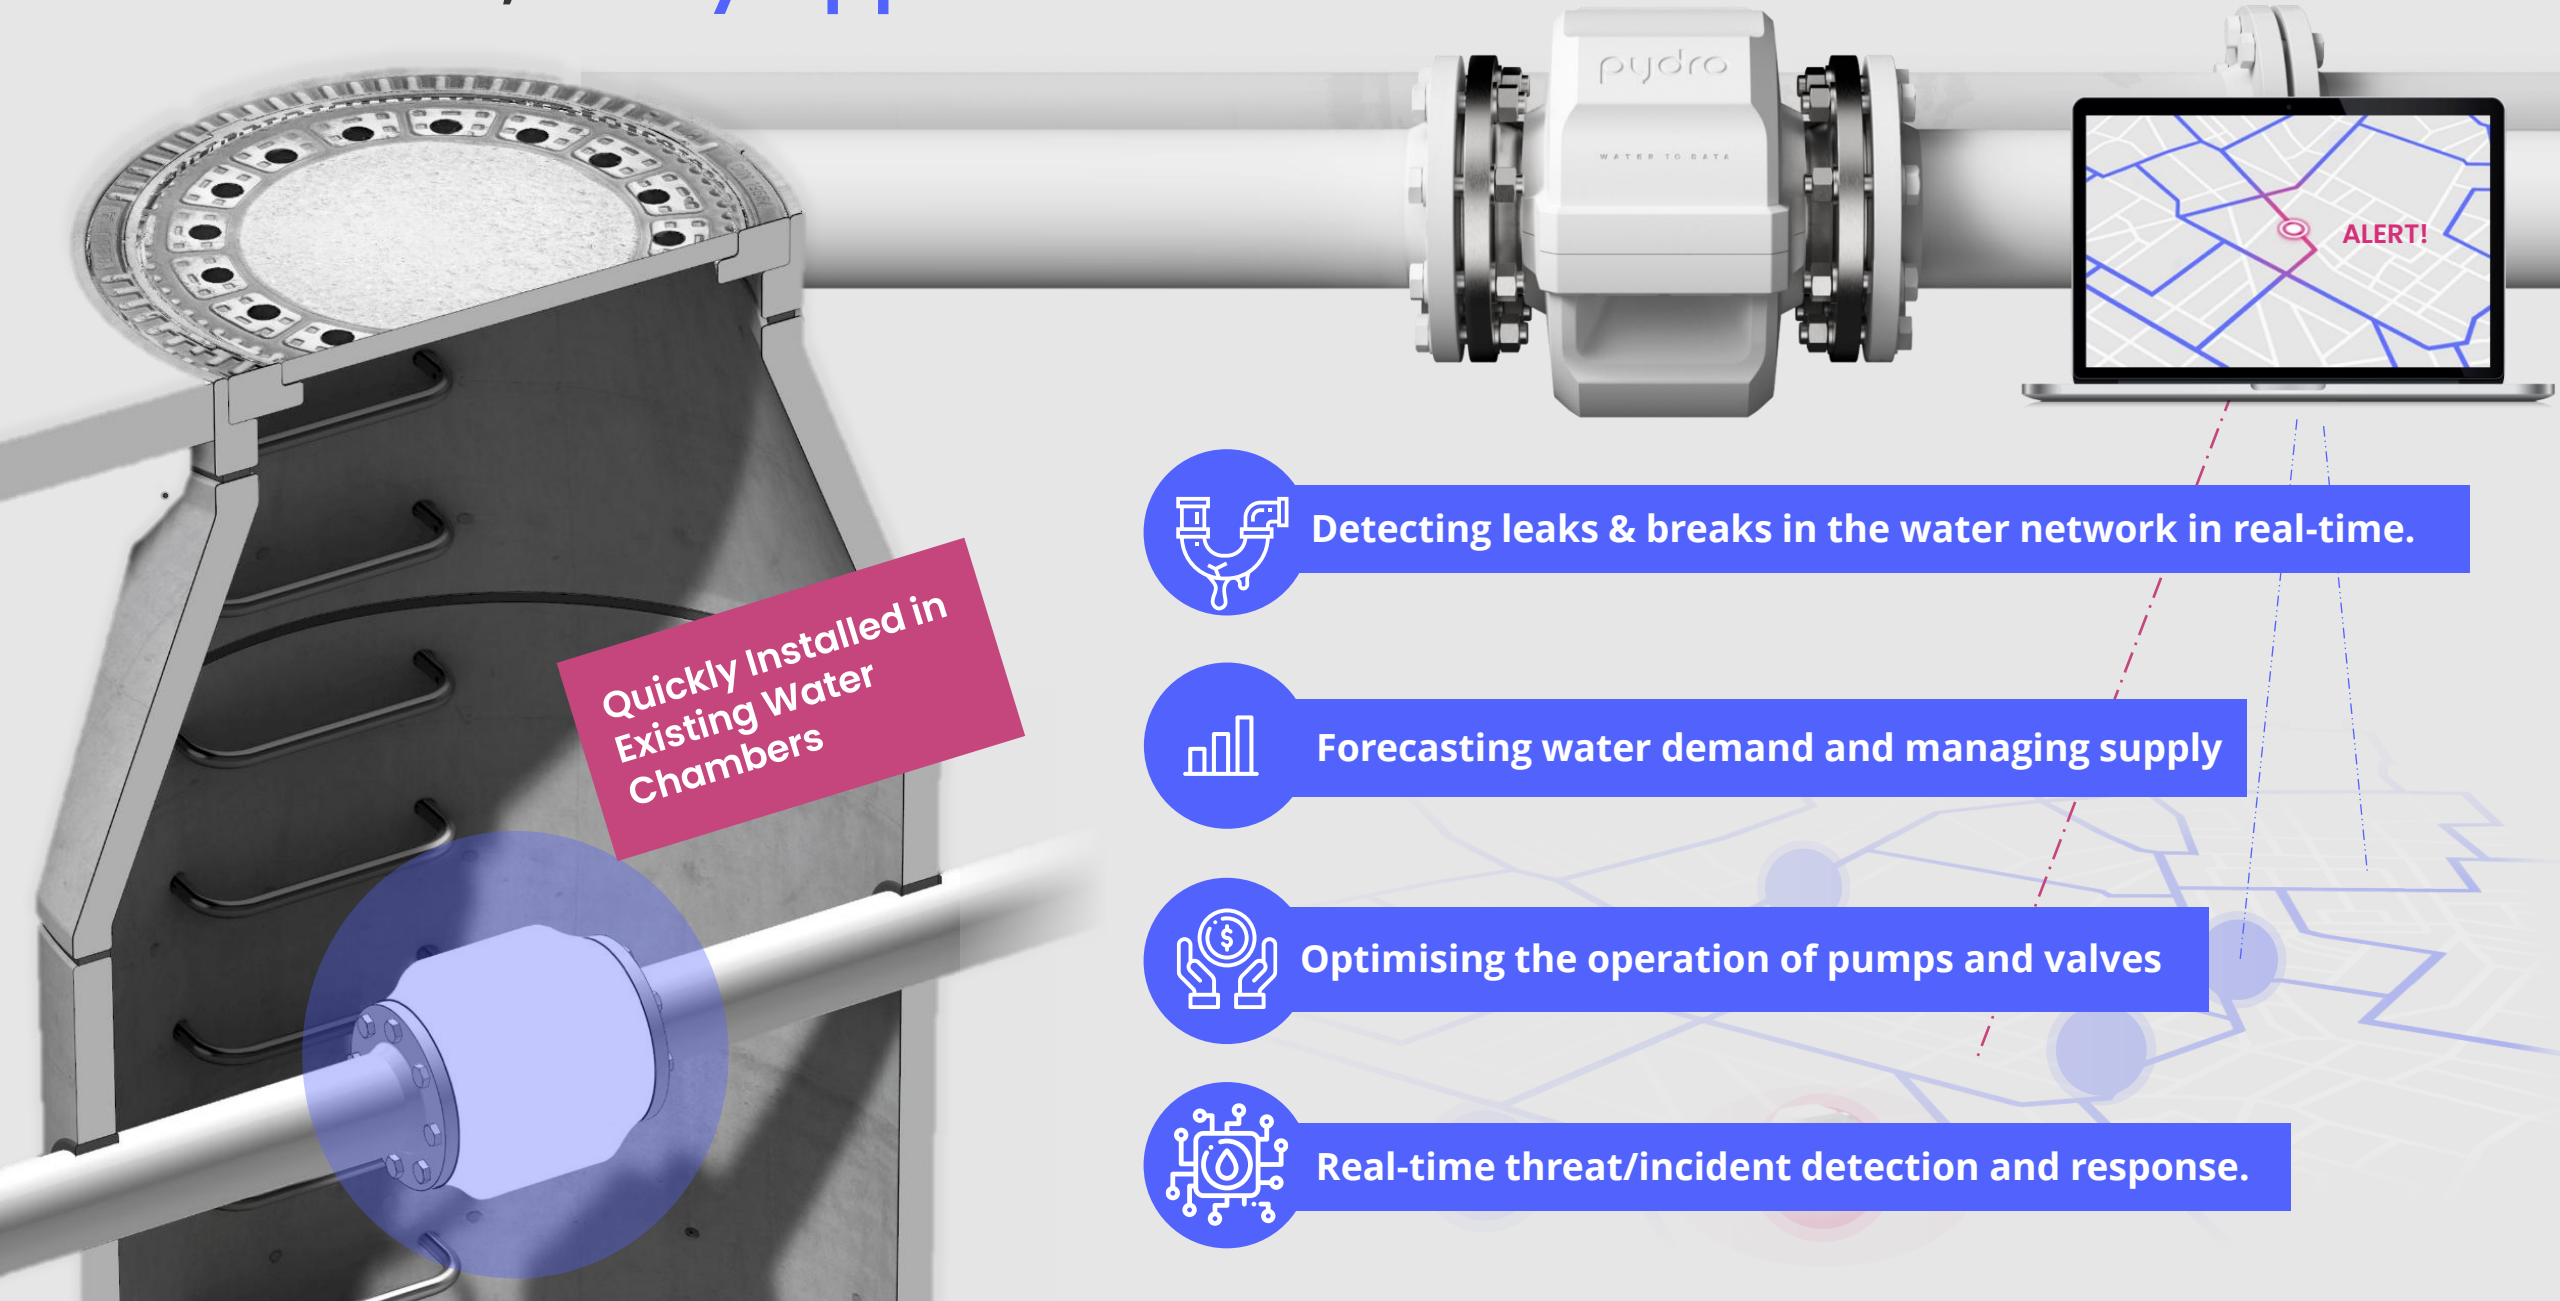

# A Smart Sensor Powered by Water Flow

## Unlocking the Full Potential of Digital Twins

# One Device, **Many Applications**

Quickly Installed in  
Existing Water  
Chambers

Detecting leaks & breaks in the water network in real-time.

Forecasting water demand and managing supply

Optimising the operation of pumps and valves

Real-time threat/incident detection and response.

**+300 Million Liters** or 108 Olympic-sized  
pools' worth of water continuously monitored.

# Creating Value through Sensing-as-a-Service

Data Collection & Transmission

Data Management & Analysis

WATER TO DATA

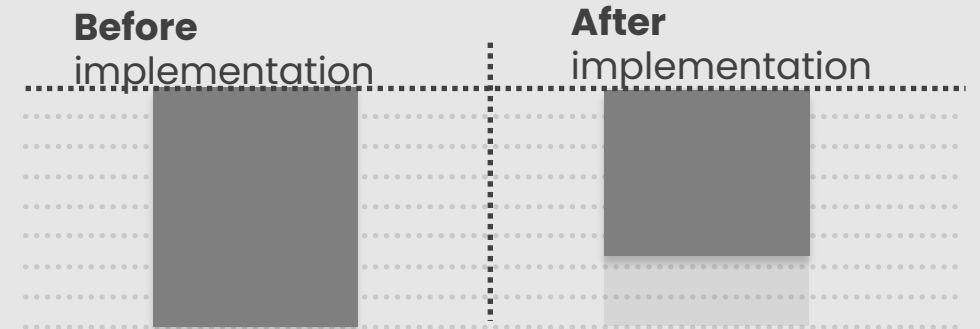

# How it works

We are aiming at a 30–40% reduction in water loss, leakage runtime and costs to find and fix leaks on a district metered area level.

## ECONOMIC DAMAGE

Water losses and costs related to finding & fixing leakages and pipe bursts.

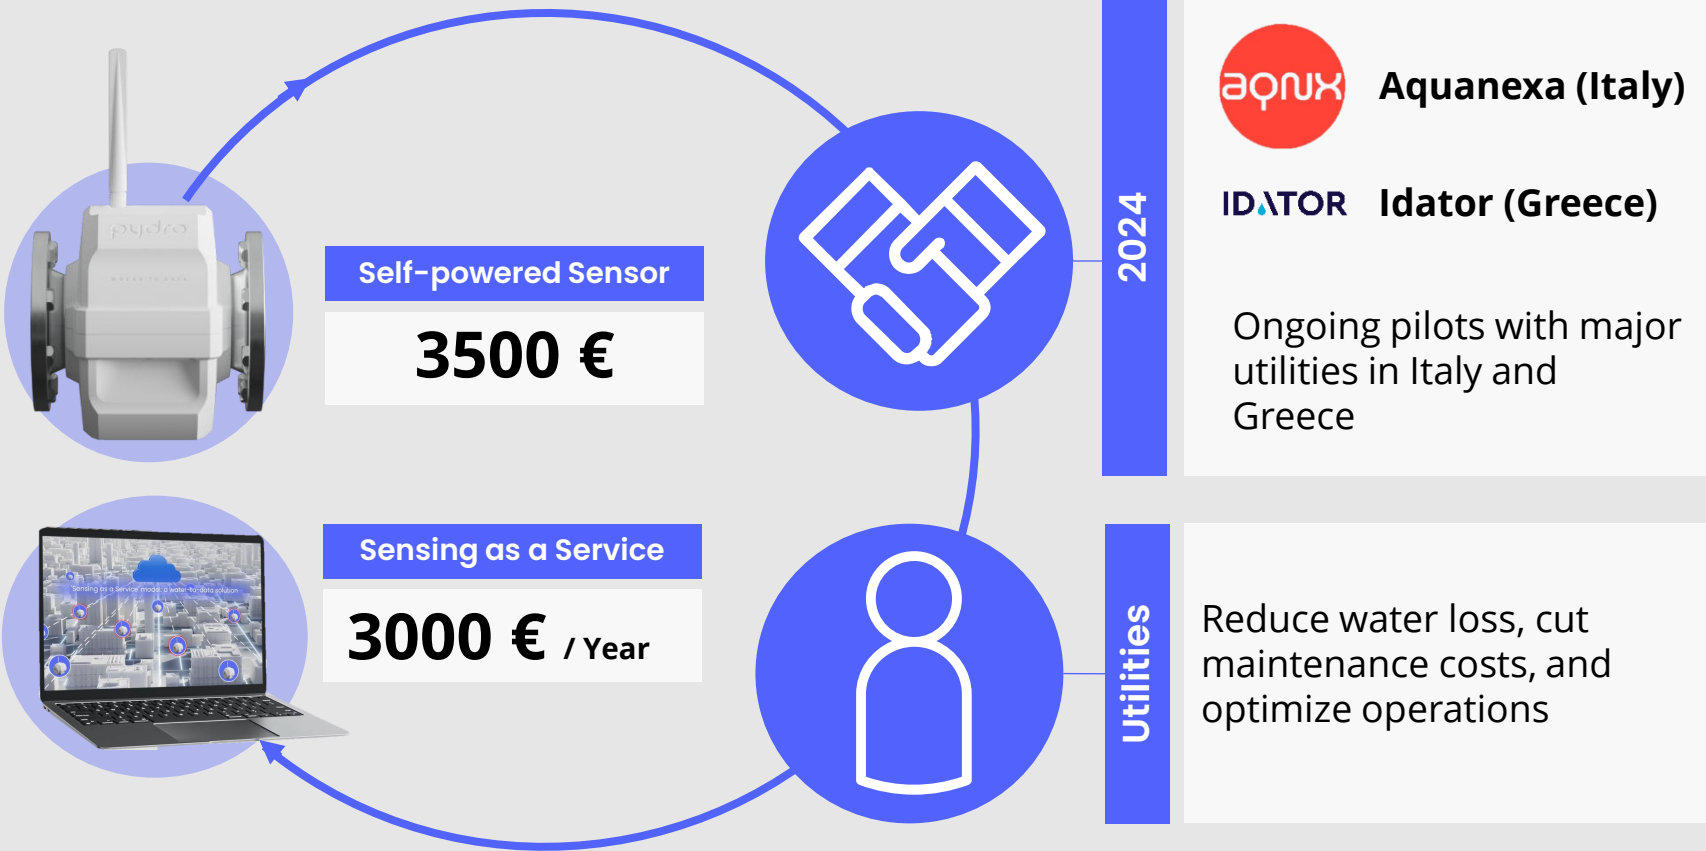

# Go-to- Market Actions

Partner with System Integrators to reach water utilities in Italy, Spain, and Greece.

Deploy pilots with customers that have strong scale-up potential.

# Scalable, Cost-Efficient Real-Time Monitoring

THE ONLY SMART REAL-TIME  
MONITORING SOLUTION  
THAT CAN BE COST-  
EFFECTIVELY DEPLOYED AT  
SCALE

expensive

Real-Time Monitoring

Installation & Maintenance

Low Total Cost of Ownership

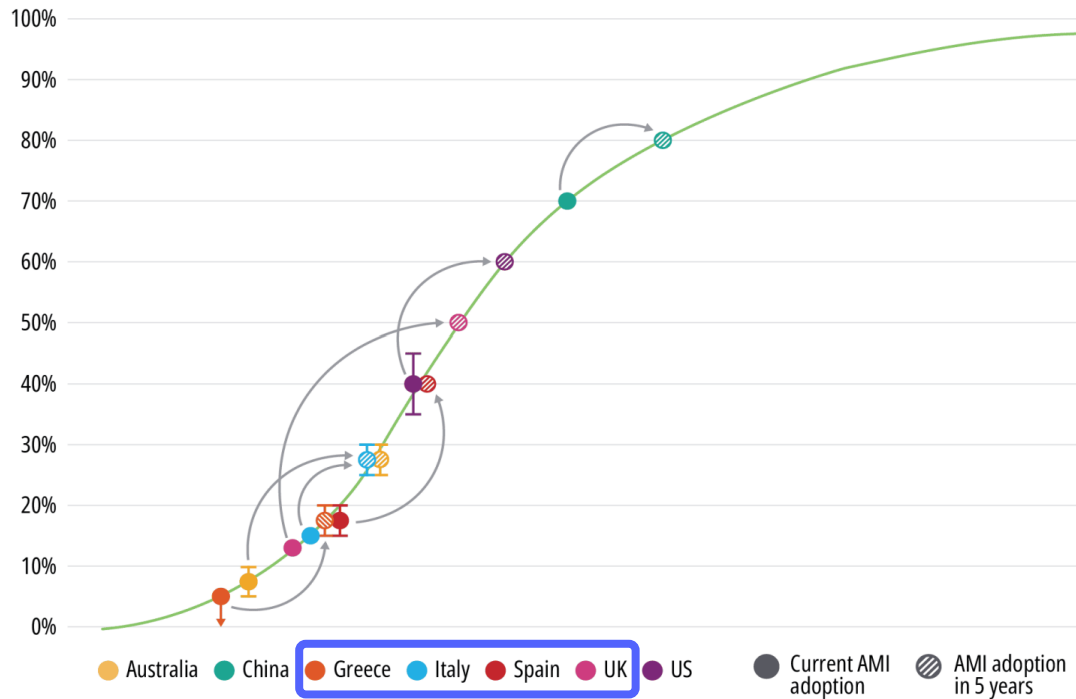

Scalability

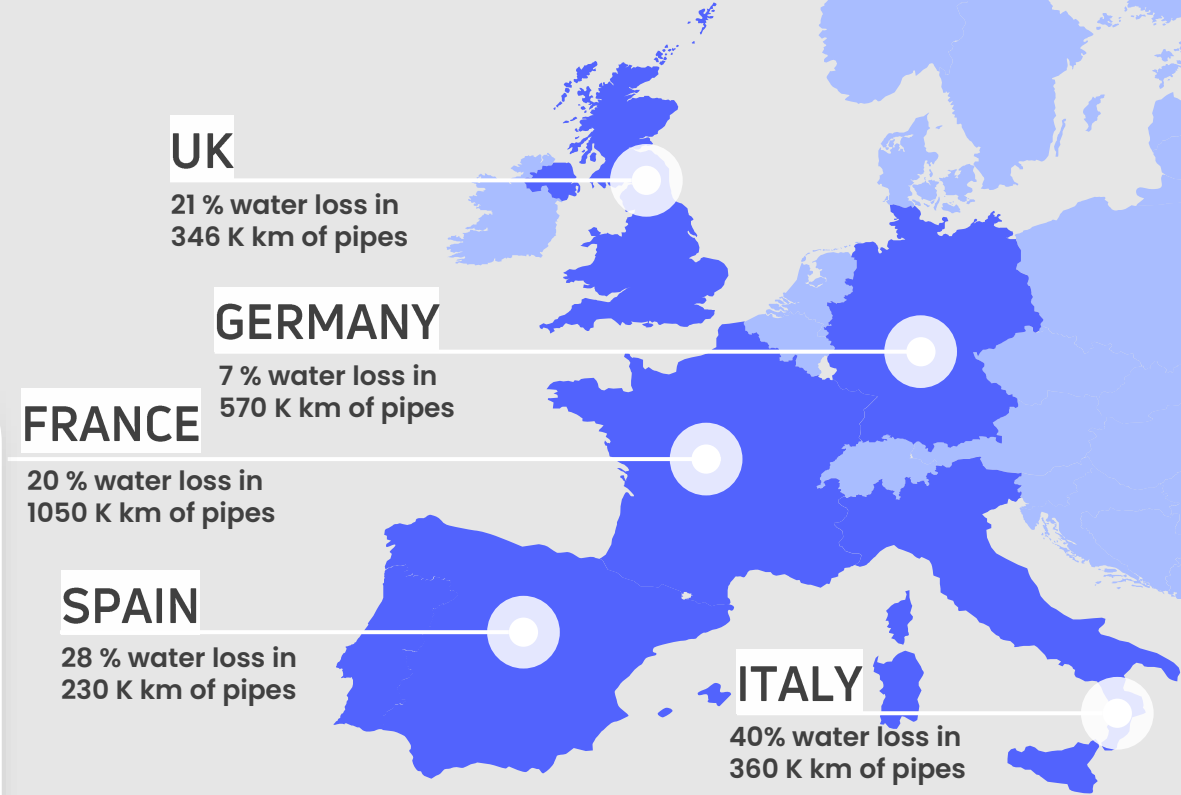

# Advanced Water Monitoring

## A market primed for substantial growth.

Advanced Metering Infrastructure (AMI) uptake is expected to grow significantly within PYDRO's Serviceable Obtainable Market over the next 5 years.

### TAM 119 Bn €

Data streams from digital meters for billing, leak detection, pressure, temperature, and water quality monitoring.

### SAM 14 Bn €

District Metering Area (DMA) monitoring sector

### SOM 685 Mn €

EU countries with water stress, high water loss and a strong willingness to invest in digitalizing their water networks—specifically the UK, Spain, Italy and Greece

# The Management

**Mulundu Sichone**  
**Co-Founder & CEO**

+8 years of entrepreneurial and industry-specific experience.  
Forbes 30 under 30 Europe (2018)  
MIT Innovator Under 35 (2022)

**Miguel Linares**  
**Co-Founder & CTO**

+14 years of experience in product development and innovation management

**Michael Hötte**  
**Business Development**

+12 years of experience in B2B Sales of Hardware and SaaS Products

# Our Advisors

**Andreas Werner**  
**Industrial IoT**

+18 years of experience in building up tech and software businesses.  
Globally acknowledged pioneer in industrial IoT.  
Sold a company to Siemens

**James Dunning**  
**Business Development**

Experienced Chief Executive Officer in utility-sector ventures through to exit.  
Leadership, Strategy, SaaS./DaaS, Exit, Specialist.

**Jurica Kovac**  
**Water loss management**

30 years of water industry experience, including 25 in water loss management, 17 with the International Water Association, and 8 years hosting a Croatian water loss conference.

**Thomas Clemens**  
**Sales**

+10 years of experience as VP sales & marketing in water leak detection

## Investors

European  
Innovation  
Council

# Investment Case

We are raising **€3.0M** to scale production, expand our product portfolio, and accelerate market entry in key regions: Italy, Greece and Spain through strategic partnerships.

## Funding Milestones

### Step 1: €1M Pre-Series A Funding (2025) to:

- Scale production to **100+ deployments in 16 months**.
- Expand market presence in **Italy, Spain & Greece**.

### Step 2: €2M Series A Funding (2026) to:

- Secure **5 large-scale contracts** with utilities
- Strengthen **strategic partnerships** for scaling

### Product Development:

- Design-to-Cost Reduction to lower production costs.
  - CE Certification to meet regulatory requirements for EU markets.
  - Expand the Product Portfolio
- 50 %**

### Marketing & Sales :

- Market expansion in Italy, Greece and Spain
  - Strategic Partnerships
  - Enabling deployments and securing 5 large-scale contracts.
- 40 %**

**Other OPEX** **10 %**

An aerial view of a city skyline, likely New York City, with a network of white lines connecting various points across the image, suggesting a global or interconnected theme. The image is split horizontally into a blue-tinted top half and a white bottom half.

*We're looking for investors that are ready to  
transform the water industry with us!*

*Time to Act.*
